Education

George Brown College

Toronto, Ontario

Advanced Diploma in Computer Programming and Analysis, GPA: 3.50/4.00

September 2022 - April 2025

- Concentrations: Web & Mobile Application Development
- Dean's List
- Related Coursework: Advanced Web Programming, Full-Stack Development, Advanced Database Development, Advanced Object-Oriented Programming, Data Structures and Algorithms, Agile Software Development, DevOps

Experience

Software Developer

September 2024 - April 2025

ServeEase

Toronto, Ontario

- Engineered a cutting-edge React Native cross-platform marketplace application, implementing real-time booking and tracking capabilities to connect homeowners with service providers
- Optimized service scheduling and communication by integrating Firebase Realtime Database, ensuring seamless interaction between service providers and customers
- Leveraged Stripe API for secure payment processing and Google Maps API for location-based service matching and discovery, enhancing user experience
- Architected a comprehensive provider dashboard featuring advanced service management, automated booking notifications, and intelligent scheduling algorithms
- Designed and implemented a user-centric customer interface with intuitive service provider discovery, streamlined appointment booking, and real-time status tracking functionality
- Developed a scalable backend infrastructure utilizing Firebase and RESTful APIs, ensuring robust user authentication and efficient data management
- Established and maintained a continuous integration and deployment (CI/CD) pipeline using Docker and Jenkins, automating testing and deployment processes for improved efficiency

Mobi Help Tutor

September 2023 - December 2023

George Brown College

Toronto, Ontario

- Provided one-on-one tutoring in web development technologies including C#, ASP.NET, JavaScript, and CSS, achieving 90% student satisfaction ratings
- Developed and delivered customized learning materials for complex programming concepts and debugging techniques
- Implemented hands-on coding exercises on web development fundamentals and SQL Server database integration
- Collaborated with instructors to create supplementary learning resources and practical coding examples

Projects

Library Room Reservation Project

Spring 2024

- Developed microservices application using Spring Boot, Java, and OAuth 2.0 authentication
- Implemented fault tolerance with Resilience4J circuit breakers and automated email notifications
- Designed scalable architecture using Docker containers and polyglot persistence (PostgreSQL, MongoDB)
- Integrated Kafka event streaming for asynchronous communication and Swagger for API documentation

Employee Management Web Application — MERN Stack

Winter 2024

- Built responsive web application using MongoDB, Express.js, React, and Node.js
- Implemented secure user authentication using JWT and real-time search functionality
- Developed RESTful APIs for CRUD operations with optimized search algorithms
- Deployed containerized application using Docker with continuous delivery through Vercel

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, PHP, HTML, CSS, SQL, C#

Frameworks & Libraries: React, Angular, Bootstrap, Next.js, Node.js, Spring Boot, ASP.NET Core, Tailwind CSS

Development Tools: Android Studio, IntelliJ IDEA, Visual Studio Code, Git, Docker, Jenkins, Kubernetes, Kafka, Travis CI, SonarQube, Postman

Cloud & Databases: AWS, Azure, MySQL, OracleSQL, MongoDB, PostgreSQL, Firebase

Methodologies: Agile Development, DevOps, CI/CD, Test-Driven Development
